# **School Readiness**

Ready Children, Ready Families, Ready Settings

Parents and carers are the child's greatest teacher and role model. School readiness can mean different things to different people. We have consulted with a range of professionals in health and education and the aim of this leaflet is to provide an understanding of how parents, carers and practitioners can help children to be ready for school. We want to work together with you to make sure all children feel happy, cared for, safe and ready to learn.

Children learn and play by being creative, being active and being involved in conversations. All children develop at their own rate and all children are different.

Children have a right to play. Children's right to play is recognised as so vital to their well-being and their development that it is included in the United Nations Convention on the Rights of the Child (1989) It is important to remember one child may have only just turned four whilst their classmate is about to turn five, there is a wide gap in their abilities in that fact alone.

As long as parents, carers and practitioners are supporting children in their work toward responsible self-care and self-regulation that is a significant achievement, the rest will come in time. The following pages include important areas to consider around school readiness.

Eat healthy, listen, and talk, play and experience, laugh and have fun!

- Give me the opportunity to play with new objects and tools to find out how they work and be allowed to choose things for myself to make a picture.
  - Share experiences, have fun and laugh together.

start it. I can hold a spoon and feed myself.

- I will go to a grown up I know when I am feeling sad, scared or worried.
- I can sometimes stop myself from . doing something I know I shouldn't be doing.
- I can follow simple routines to help me do things by myself.
- I choose the toys I want to play with and what I want to do with them.
- I know I can use tools like scissors. spoons, and hammers to do different things.
- I like to use lots of different things like paint, paper, and wool to make a picture and using the materials.
- I am beginning to like some things more than others; I may like painting and drawing more than dancing or singing.

When children feel confident and believe in themselves, they are more willing to take on new challenge, good practice starts with the child, and grows in partnership.

## Top tips for parents and carers

- Your child learns better when they feel well and can see and hear well. Health checks and immunizations help to keep your child healthy. Any health problems your child may have should be addressed early so that they can do well in school. Sometimes the classroom or the school routine need to be adjusted to accommodate a child who has a special need.
- Take many opportunities to talk together with your child.
- Allow opportunities for playful learning and stimulating your child's imagination and curiosity.
- Provide many opportunities to read with your child at home without distractions from iPads, TVs or mobile phones.
- Try to have a good morning and nighttime routine that is not rushed so your children arrive at nursery and school in a calm frame of mind and are not tired from a late or disturbed night.
- Allow your child to try and carry out independent tasks such as getting dressed or doing little jobs or simple tasks where they follow simple instructions. Don't rush your child's attempts to do things for themselves. The natural urge to be independent is good and should be embraced.
